Professional Summary

Pre-final year IT engineer with hands-on experience building full-stack applications, AI-powered systems, and REST APIs. Strong communicator, hackathon builder, and quick learner — eager to solve real business problems in client-facing environments.

Education

Sri Shakthi Institute of Engineering and Technology *Sep 2023 — Sep 2027*
B.Tech in Information Technology — **CGPA: 8.73/10**

K.G. International School, Coimbatore *Jun 2022 — Apr 2023*
HSC — 87%

Skills

Languages: C, Java, Python, SQL

Frontend: React, Vite,Next.js, Tailwind CSS,HTML

Backend: FastAPI, Node.js, Express, REST APIs

Databases: PostgreSQL, MongoDB, SQLite

AI / ML: LLM Integration (Gemini, OpenAI), AI Agents, Prompt Engineering, RAG Pipelines

Tools & Infrastructure: Docker, Git, GitHub, Vercel, n8n

Projects

AI Agent with Persistent Semantic Memory ***2026***
Python · FastAPI · Supabase (pgvector) · Ollama API · React · Vite

- Built an AI agent with long-term semantic memory in a 36-hour hackathon — used pgvector on Supabase to store interactions as embeddings and injected retrieved context into Claude's system prompt for context-aware responses.
- Delivered a full agentic pipeline (FastAPI + Claude API + React/Tailwind) with a visual memory sidebar — demonstrating end-to-end flow: input → embedding → vector search → memory injection → LLM response

AI Form Filling Assistant ***2025 – 2026***
Python · OpenCV · OCR · Flask

- Developed an AI-powered web application that extracts structured data from Aadhaar/PAN cards using OCR and image preprocessing pipelines.
- Implemented OpenCV-based image enhancement techniques, improving text extraction accuracy by 18%.
- Designed RESTful Flask APIs to auto-fill government forms with extracted data and built-in user verification flows

IT Service Desk Chatbot — AI Ticket Triage System ***2026***

Python · FastAPI · Claude API · React · Tailwind CSS · Supabase

- Built an AI-powered helpdesk chatbot that classifies incoming IT support tickets by priority and category, suggests solutions from a knowledge base using RAG, and auto-escalates unresolved issues — reducing manual triage effort for IT teams.
- Designed a full-stack interface with a real-time ticket dashboard, conversation history, and agent handoff flow — deployed on Vercel with a FastAPI backend and Supabase for ticket persistence.

Achievements

- Hosted 2 major college cluster events as Host Lead at college club— experienced in live communication, stage presence, and delivering confident on-stage communication across 500+ attendee gatherings.
- Consistent reader of self-improvement ,developed strong habits of empathy, perspective-taking, and articulate expression
- Proactively guide and mentor junior students — conducting informal sessions on tech, confidence-building, and communication
